

BEIGE CARE

GLOVE

CONTAINS NANO-SILVER

**DELAYS DUST AND DIRT
DEPOSITION** on cleaned surfaces,
ensuring cleanliness for longer

FOR DAMP CLEANING

Does not require the use of
ANY CHEMICALS for cleaning

Material:

MICROFIBER MATERIAL

Soft material for wet cleaning. Thanks to its electrostatic properties, it attracts dust and prevents it from floating in the air and settling on cleaned surfaces. Due to its durability and chemical-free operation, it is an ecological and economical choice.

EASY TO CARE - can be washed by hand using NanoSilver antibacterial soap or in a washing machine at temperatures up to 60°C (using Nanosilver Care washing liquids, without softeners or fabric softeners)

RETAINS EFFECTIVENESS even after dozens of washes

**EFFECTIVENESS CONFIRMED
BY TESTS PERFORMED**
at the Environmental Research
Laboratory in Wrocław EKOLABOS

HAS A CERTIFICATE
of the national institute of public
health PZH

M I C R O F I B E R S

Fibers with a diameter of 20 micrometers and a structure resembling human hair. This means that there is a groove in them, into which dirt can penetrate, accumulate and not penetrate back to the cleaned surface. Additionally, silver nanoparticles introduced into the fibers have properties that can affect the elimination of some undesirable substances and impurities. The effectiveness of these cleaning agents is maintained even after dozens of washing cycles.

H O W T O U S E

For damp use.

It is used together with the quick-fit head and the telescopic rod.

For dusting any flat surfaces that do not tolerate large amounts of water: raw wood, plank floors, wooden mosaics, etc.

During washing, dirt is easily removed, leaving the fibers clean and ready for further use. As they are used, their structure is slightly damaged, which increases their ability to absorb dirt. In addition, the material can even absorb unpleasant odors.
